ACKNOWLEDGEMENTS

This fifth version of the Municipal Sustainability Index was only possible thanks to the work and availability of various entities, to whom we are very grateful.

We refer first of all to the National Statistical Institute of Portugal, which publishes on its website most of the indicators used in this work or the data necessary for their calculation, thus fulfilling its mission. We would also like to mention many other entities that produce and disseminate statistics and that, on their own initiative or at our request, shared statistical information essential to the development of this Index. It includes, the Portuguese Environment Agency, the High Commission for Migration, the European Blue Flag Association, the Commission for Citizenship and Gender Equality, the National Commission for the Promotion of the Rights and Protection of Children and Young People, the Directorate-General for Agriculture and Rural Development, the Directorate-General for Local Authorities, the Directorate-General for Education, the Directorate-General for Energy and Geology, the Directorate-General for Justice Policy, the Francisco Manuel dos Santos Foundation (Pordata), the Office for Strategy and Planning in the Ministry of Labour, Solidarity and Social Security, the Regulatory Authority for Water and Waste Services, the Institute for Nature Conservation and Forests, the Institute for Employment and Vocational Training, the National Institute of Health Doutor Ricardo Jorge, Quercus, the Service for Intervention in Addicted Behaviours and Dependencies, and Turismo de Portugal.

A special thanks to our director, Ricardo F. Reis, and to our colleagues Filipa Rodrigues and Tânia Correia for their support and encouragement, and to the Catholic University of Portugal, represented by the Rector, Professor Isabel Capelo Gil, for always having believed in this project and for having supported it from the very beginning.

A special acknowledgement to all the people from the municipalities in the CESOP-Local Network. We have received support, enthusiasm and participation from elected representatives and technicians that have greatly contributed to the improvement of the Sustainable Territories project and, in particular, to this ISM. The municipalities of Abrantes, Águeda, Almada, Braga, Cascais, Chamusca, Fundão, Grândola, Guimarães, Horta, Lagoa, Lagos, Loures, Mação, Mafra, Palmela, Porto, Santo Tirso, Sintra, Torres Novas, Torres Vedras, Valongo, Vila Franca de Xira and Famalicão contributed to the construction of the Municipal Sustainability Index 2022.

This report is dedicated to our colleague José Fidalgo Gonçalves. Together, we idealised and made the CESOP-Local Unit grow, the *Sustainable Territories* project and this Municipal Sustainability Index. Together we dreamt and made real the best that is done in terms of evaluation and monitoring of sustainable development at local level. The three who sign this document are grateful for the availability, the curiosity, the commitment, the questioning, the friendship that Fidalgo has offered us.

INTRODUCTION

“A to-do list...”

2030 AGENDA

On 1 January 2016 the 2030 Agenda for Sustainable Development came into effect. This Agenda consists of 17 goals to transform our world. As Ban Ki-moon, the UN Secretary-General at the time, said, these goals are “a to-do list for people and planet, and a blueprint for success”.

“This Agenda is a plan of action for people, planet and prosperity. It also seeks to strengthen universal peace in larger freedom. We recognise that eradicating poverty in all its forms and dimensions, including extreme poverty, is the greatest global challenge and an indispensable requirement for sustainable development.

All countries and all stakeholders, acting in collaborative partnership, will implement this plan. We are resolved to free the human race from the tyranny of poverty and want and to heal and secure our planet. We are determined to take the bold and transformative steps which are urgently needed to shift the world onto a sustainable and resilient path. As we embark on this collective journey, we pledge that no one will be left behind.

The 17 Sustainable Development Goals and 169 targets which we are announcing today demonstrate the scale and ambition of this new universal Agenda.

They seek to build on the Millennium Development Goals and complete what these did not achieve. They seek to realize the human rights of all and to achieve gender equality and the empowerment of all women and girls. They are integrated and indivisible and balance the three dimensions of sustainable development: the economic, social and environmental.

The Goals and targets will stimulate action over the next fifteen years in areas of critical importance for humanity and the planet:

People. We are determined to end poverty and hunger, in all their forms and dimensions, and to ensure that all human beings can fulfil their potential in dignity and equality and in a healthy environment.

Planet. We are determined to protect the planet from degradation, including through sustainable consumption and production, sustainably managing its natural resources and taking urgent action on climate change, so that it can support the needs of the present and future generations.

Prosperity. We are determined to ensure that all human beings can enjoy prosperous and fulfilling lives and that economic, social and technological progress occurs in harmony with nature.

Peace. We are determined to foster peaceful, just and inclusive societies which are free from fear and violence. There can be no sustainable development without peace and no peace without sustainable development.

Partnership. We are determined to mobilize the means required to implement this Agenda through a revitalised Global Partnership for Sustainable Development, based on a spirit of strengthened global solidarity, focussed in particular on the needs of the poorest and most vulnerable and with the participation of all countries, all stakeholders and all people.

The interlinkages and integrated nature of the Sustainable Development Goals are of crucial importance in ensuring that the purpose of the new Agenda is realised. If we realize our ambitions across the full extent of the Agenda, the lives of all will be profoundly improved and our world will be transformed for the better.”

Source: United Nation, *Transforming our world: the 2030 Agenda for Sustainable Development*

“Leave no one behind”

REALISATION AND LOCALISATION OF THE 2030 AGENDA

The 2030 Agenda sets 17 Sustainable Development Goals (SDG), composed by 169 targets. On the 6th July 2017, the UN General Assembly approved a set of 252 indicators that seek to reflect and measure accurately these targets (Resolution 71/313). These indicators were mostly designed for an overall assessment of each State. However, as reflected very well in Resolution 70/1, adopted by the General Assembly on 25 September 2015, “Leave no one behind” (p.3) “Recognizing that the dignity of the human person is fundamental, we wish to see the Goals and targets met for all nations and peoples and for all segments of society. And we will endeavour to reach the furthest behind first.” (p.3). For this reason, Resolution 71/313 clearly states that “Sustainable Development Goal indicators should be disaggregated, where relevant, by income, sex, age, race, ethnicity, migratory status, disability and geographic location”.

Because the country is not homogenous and because we need everyone on board, we have tried to study the applicability of global indicators (those proposed in Resolution 71/313) to local reality, in line with what the National Statistical Institute of Portugal (INE) is already doing for the national reality, seeking to maintain coherence and alignment between the various levels of analysis (global, national, local)

Whenever local level data are available for the indicators used by INE, we adopt these indicators. When this information is not disaggregated or does not exist at the municipal level, we try to determine if data is available at the municipal level for the indicators proposed by various entities for monitoring the 2030 Agenda at the national or local level. This year, the indicators as well

as the evaluation criteria have been revised and updated based on the following reference documents:

- IAEG-SDGs – *Global indicator framework for the Sustainable Development Goals and targets of the 2030 Agenda for Sustainable Development* (E/CN.3/2021/2, Annex)
- INE - *Objetivos de desenvolvimento sustentável - Agenda 2030. Indicadores para Portugal – 2010/2020*
- Eurostat - *Sustainable development in the European Union - Monitoring report on progress towards the SDGs in an EU context - 2021 edition*
- OCDE – *Measuring Distance to the SDG Targets* (2019 edition)
- OCDE – *A Territorial Approach to the Sustainable Development Goals*
- SDSN., Bertelsmann Stiftung, e Cambridge University Press – *Sustainable Development Report 2021. The Decade of Action for the Sustainable Development Goals*
- SDSN e IEEP – *Europe Sustainable Development Report 2020. Meeting the Sustainable Development Goals in the face of the COVID-19 pandemic*

In 2018 we presented the first version of a sustainable development index at municipal level. Since 2019 we constantly presented improved versions of the first one. This document you are now reading is the fifth version of this our Municipal Sustainability Index. It is also (and always) a work in progress document, resulting from the investigation carried out by the CESOP-Local team and from the collaboration that the partner municipalities have been willing to offer in meetings and in digital forums created

for this purpose. Inspired by the SDG-Index methodology, it is an index that allows each municipality to obtain a diagnosis of its

territory regarding each of the 17 SDGs and each of the targets and indicators analysed..

THE MUNICIPAL SUSTAINABILITY INDEX

The fifth version of the ISM was established from data available on the websites of various institutions. The majority of the data was collected from the INE website¹, but also from the PORDATA website², and official websites of different General Directorates. Some State bodies and some private organisations collaborated by sharing with us data, disaggregated to municipal level, from their studies and reports.

This work is not completed. We seek a constant improvement of the quality of our data and indicators with the contribution of our partner municipalities and the different entities that produce and disseminate statistics in Portugal. Improvement that is reflected:

- **In the number of indicators.** This version of the ISM has 133 indicators (117 unique), related to 66 targets, improving the numbers from the previous year (130/129/123/101 indicators, related to 66/66/64/65 targets).

- **In standardisation and alignment.** The continuous improvement process through the standardisation of processes and criteria is more important than the increase in the number of indicators and targets covered, in order to align this Index with the work developed by the national and European statistical authorities.
- **In the graphic presentation.** Year after year, our commitment is to make our report simpler, more informative and easier to read. The changes from the first edition to this one are quite significant, as it seeks to bring more information related to the evolution of each indicator, focusing the analysis and the reading more on the path than on the point on the way.

The following figure shows the number of indicators that CESOP-Local was able to gather for each SDG and compares this number with the indicators proposed by the United Nations and with the sets of indicators used by Eurostat and INE.

¹ www.ine.pt

² www.pordata.pt

Number of indicators per SDG in the other monitoring reports *

*In order to compare, the following should be taken into consideration: (1) the UN numbers are idealized by this entity (many of these indicators do not have data) for comparison between countries; (2) All the reports with the exception of the ISM are based on national data; (3) CESOP indicators are those that exist and have relevance at the municipal level.

Data availability at the local level. Data availability at the municipal level fluctuates considerably from SDG to SDG, and some SDGs have very few indicators. Consequently, the evaluation of the SDGs at the municipal level is sometimes dependent on a small number of indicators, which limits the scope of the information on the SDGs and, at the same time, creates issues in the distribution of values between municipalities.

We intend to illustrate this issue in graph 1. In this whiskers box plot, for each SDG, the maximum and minimum value (maximum and minimum limits of the vertical lines) obtained by municipalities in the country can be observed. The larger or smaller size of the box indicates greater or lesser dispersion in the distribution of results between municipalities.

Graph 1: Variation of municipalities' performance in meeting the Sustainable Development Goals

Definition of limits and normalisation of the indicators. Each indicator has its own unit of measurement. In order to be aggregated, all indicators have to be normalised, which means that they are all converted into a scale from 0 (zero) to 100 (one hundred). This requires the definition of a maximum value, which represents the objective to be reached, and a minimum value, which represents the starting point (e.g. 2015 value) or the minimum acceptable value.

The criteria used in the definition of limit values, classified according to the OECD methodology, are shown in the table below. The limit values defined for each of the indicators can be found in the Annexes to this report.

$$\frac{(\text{Municipality value} - \text{Minimum value})}{(\text{Maximum value} - \text{Minimum value})} * 100$$

Normalisation formula

Means of setting limit values for indicators		
A1	SDG-based, absolute target in the future	End-value referred to in SDGs, e.g. infant mortality at 12 per 1 000 lives
A2	SDG-based, target relative to starting position	End-value referred to in SDGs, e.g. reduce by half the proportion of people living in poverty
B1	Other international agreement or shared aspirations, absolute target in the future	End-value set by International Agreements, Good Practices or other Established Frameworks, e.g. achieve 60% of municipal waste prepared for re-use and recycling (European Commission)
B2	Other international agreement or shared aspirations, target relative to starting position	End-value set by International Agreements, Good Practices or other Established Frameworks, e.g. Reduce greenhouse gas emissions by 60% compared with 2009 level (European Commission)
C1	No explicit value; performance benchmarked against OECD or EU top performers	End-value set by CESOP-Local by based on the 5 top performers within the country, OECD countries or EU countries in 2015
C2	No explicit value, estimated on the basis of national values	End-value set by CESOP-Local by based on country values in 2015: national average + or - standard deviation * 1.5
D	No normative direction	

RESULTS AND INTERPRETATION

The Municipal Sustainability Index is composed of 133 indicators. They represent the various targets set out in the 2030 Agenda and these, in turn, reflect the 17 SDGs. This index provides a global value that shows the municipality's position between the worst (0) and the best (100) possible regarding its sustainable development. Thus, for instance, a value of 62.8 means that, on average, 62.8% of the path to sustainable development is fulfilled.

Since a single number is a very reductive depiction of reality, the results for each municipality are also presented for each of the 5Ps (People, Planet, Prosperity, Peace and Partnerships) and for each of the GESA dimensions (Governance, Economy, Social, Environment). These are two ways of aggregating the 17 SDGs and targets of the 2030 Agenda, and present themselves as intuitive ways of reducing and presenting statistical information related to sustainable development.

From indicators to targets. The score for each target is the arithmetic mean of the scores of the indicators that constitute it.

From the targets for the SDGs. The score for each SDG is the arithmetic mean of the scores of the targets that constitute it.

From the SDGs to the 5Ps. The score of each of the 5Ps (People, Planet, Prosperity, Peace and Partnerships) is the arithmetic mean of the SDGs that are aggregated in it.

From the targets for the GESE. Each target was assigned with one or more of the GESE dimensions (Governance, Economy, Social, Environment). The score for each of these four dimensions results from the arithmetic mean of the targets assigned to it.

This report uses a colour system to classify the municipality's situation for each indicator,

target and SDG. The colours used, respecting the international colour system, are green, yellow, orange and red. The meaning of the colours for indicators, targets and Sustainable Development Goals is as follows:

1. Indicators (only in the annex)
 - a. Indicator shown in **green** means that it is fully achieved;
 - b. Indicator shown in **yellow**, more than half of the path is completed;
 - c. Indicator shown in **orange**, less than half of the path has been completed;
 - d. Indicator shown in **red**, all the work is yet to be done.
2. Targets (only in the annex)
 - a. Green, if all indicators are green;
 - b. Yellow, if the average of the indicators' score is above 50 on a scale of 0 to 100;
 - c. Orange, if the average of the indicators' score is below 50;
 - d. Red, if all indicators are red.
3. Sustainable Development Goals
 - a. Green, if all targets are green;
 - b. Yellow, if the average of the two worst performing targets is above 50;
 - c. Orange, if the average of the two worst performing targets is below 50;
 - d. Red, if at least two targets are red.

Comparison Levels. In addition to the results of the municipality, this report also presents the results at the national level, and the results of the NUTS II and NUTS III regions where the municipality is located. Since the third edition, the municipality has the possibility to compare itself with the average scores of the fifteen municipalities with the closest socio-economic profile. These groups of socio-economically

comparable municipalities were defined by the office of the Secretary of State for Local Administration.

Comparison with previous years. The number of indicators used, their limit values and even some calculation methodologies differ from year to year between editions of the ISM. To maintain comparability, ISM

performance from previous years are recalculated according to the metrics used in the actual edition.

Throughout the report, a system of arrows is also used to classify the municipality's evolution for each indicator and SDGs. The meaning of the arrows, for indicators and Sustainable Development Goals, is as follow:

Meaning of the arrows showing the municipality's progress towards the 2030 Goal objectives	
Arrow	Description
	The municipality is on track to meet the 2030 objectives, and progress is sufficient to achieve them
	The municipality is on track to meet the 2030 objectives, but will not be able to achieve them if it continues its current trend
	The municipality is not making significant progress towards the 2030 objectives
	The municipality is distancing itself from the 2030 objectives
	The municipality is far from the 2030 objective path

Projections. For indicators that have a time series with sufficient data, the line graphs show:

(1) a *Path to the objective*, which projects the ideal path that the municipality should follow or overcome to achieve its objective in 2030; based on the year 2015 (or later year where the time series starts)

(2) a *Projection*, which represents the point where the municipality will reach in 2030 based on the evolution of data between the

year 2015 (or later year where the time series starts) and the most recent year with available information, resulting from an Excel formula. This projection is hypothetical and may present values that are impossible to achieve (e.g. reach an unemployment rate of 0%)

Further details on how to read the graphical information throughout this report can be found in Annex 1 (p.131)

5P'S DIMENSIONS

The value of each of the 5P's results from the arithmetic mean of the SDGs aggregated in it.

SUSTAINABLE DEVELOPMENT GOAL DASHBOARDS AND 2019-2021 TRENDS

Meaning of the SDG icons' colours

	All targets are green
	The average of the two worst performing targets is above 50
	The average of the two worst performing targets is below 50
	At least two targets are red
	SDGs not applicable in the municipality

Representation of SDG progress

	The municipality will achieve the SDG or has already achieved it
	The municipality is on the right track but will not meet the SDGs if it continues at this pace
	The municipality is on the opposite path of this SDG
	The municipality is far from the path to meet this SDG
	The municipality has not progressed significantly

SDG 1

NO POVERTY

END POVERTY IN ALL ITS FORMS EVERYWHERE

Extreme poverty rates have been cut by more than half since 1990. While this is a remarkable achievement, one in five people in developing regions still live on less than \$1.25 a day, and there are millions more who make little more than this daily amount, plus many people risk slipping back into poverty.

Poverty is more than the lack of income and resources to ensure a sustainable livelihood. Its manifestations include hunger and malnutrition, limited access to education and other basic services, social discrimination and exclusion as well as the lack of participation in decision-making. Economic growth must be inclusive to provide sustainable jobs and promote equality.

↗	The municipality is on track to meet the 2030 objectives, but will not be able to achieve them if it continues its current trend
→	The municipality is not making significant progress towards the 2030 objectives
↘	The municipality is distancing itself from the 2030 objectives
↓	The municipality is far from the 2030 objective path

Target 1.2 | By 2030, reduce at least by half the proportion of men, women and children of all ages living in poverty in all its dimensions according to national definitions

Indicator 1.2.1. Proportion of RSI¹ beneficiaries in the working-age resident population (‰)

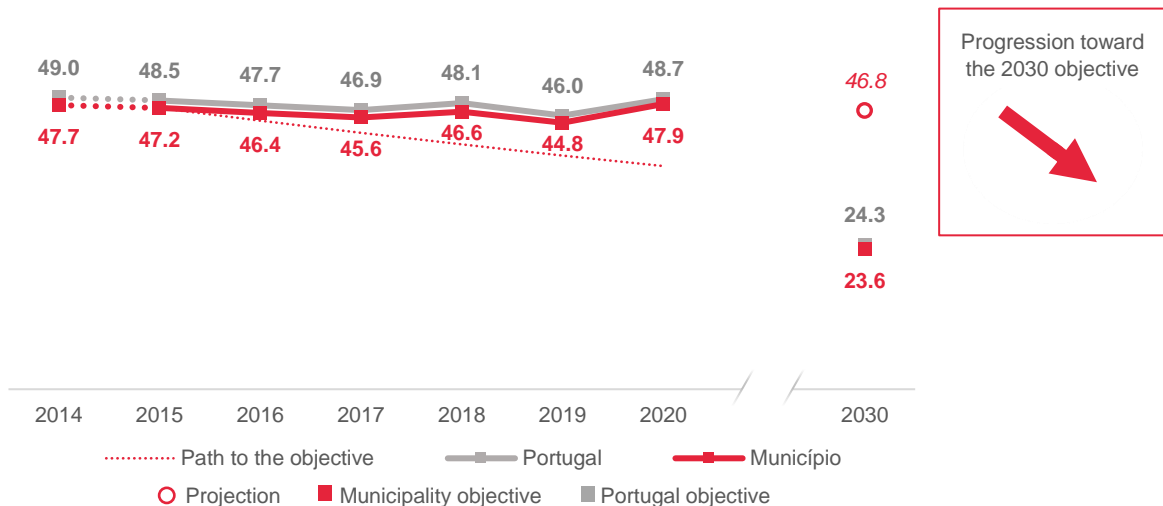

Proportion of RSI beneficiaries in the working-age resident population (‰)

Source: INE (2011-2020)

The United Nations establishes the national poverty line as 60% of median income per equivalent adult. In Portugal, the poverty line corresponds to 474€ (2015). The Social Insertion Income (RSI) is granted if the pensioner earns less than 190€ per month.

Indicator 1.2.2. Proportion of children and young people benefiting from Social Security family allowance (%)

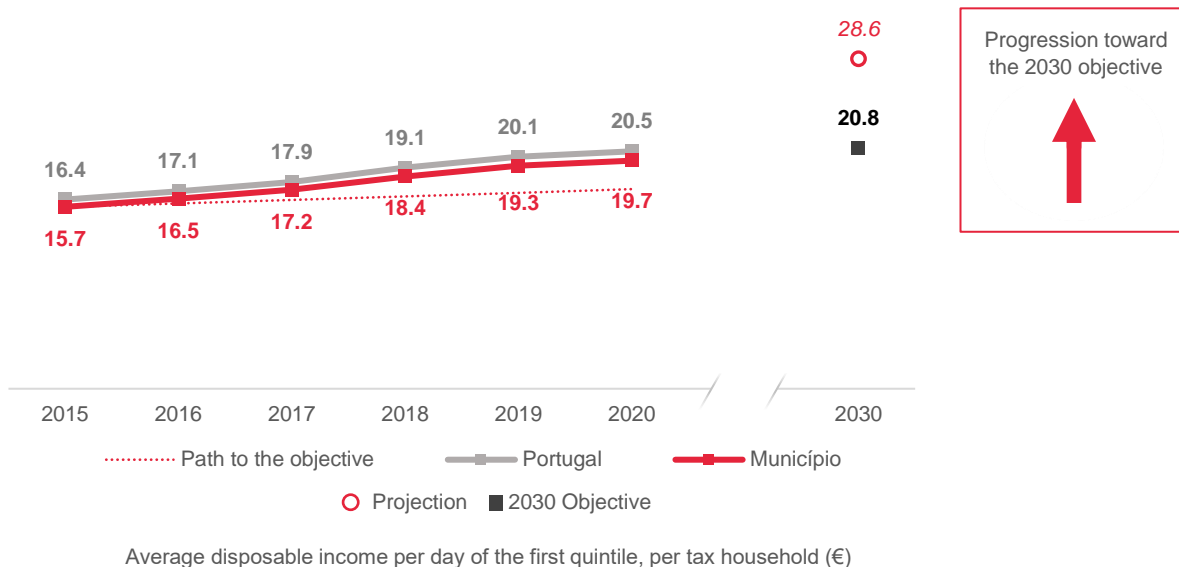

Proportion of children and young people benefiting from Social Security family allowance (%)

Source: INE (2014-2020)

¹ The Social Insertion Income (RSI, Portuguese acronym) is a benefit of the Portuguese Solidarity Subsystem within the Social Protection System of Citizenship of the Portuguese Social Security.

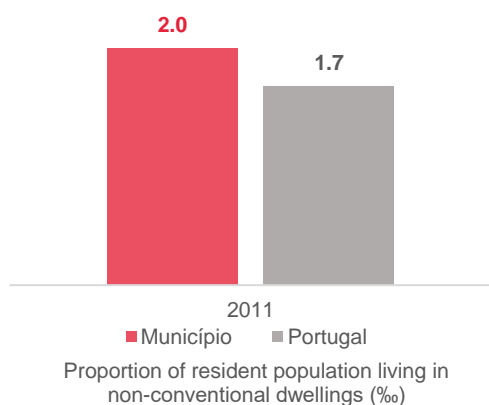

Indicator 1.2.3. Average disposable income per day of the first quintile, per tax household (€)

Source: INE (2015-2020), calculated by CESOP

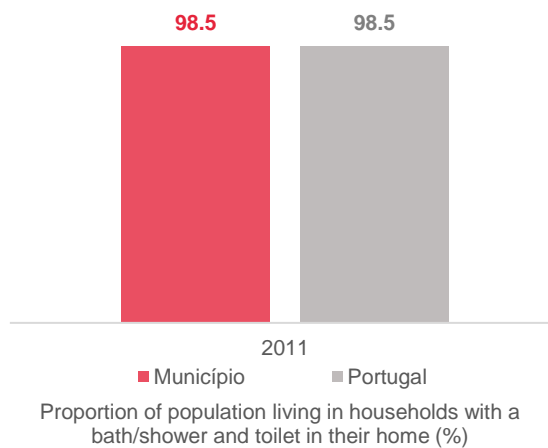

Target 1.4 | By 2030, ensure that all men and women, in particular the poor and the vulnerable, have equal rights to economic resources, as well as access to basic services, ownership and control over land and other forms of property, inheritance, natural resources, appropriate new technology and financial services, including microfinance

Indicator 1.4.1(a). Proportion of resident population living in non-conventional dwellings (%)

Source: INE (2011), calculated by CESOP

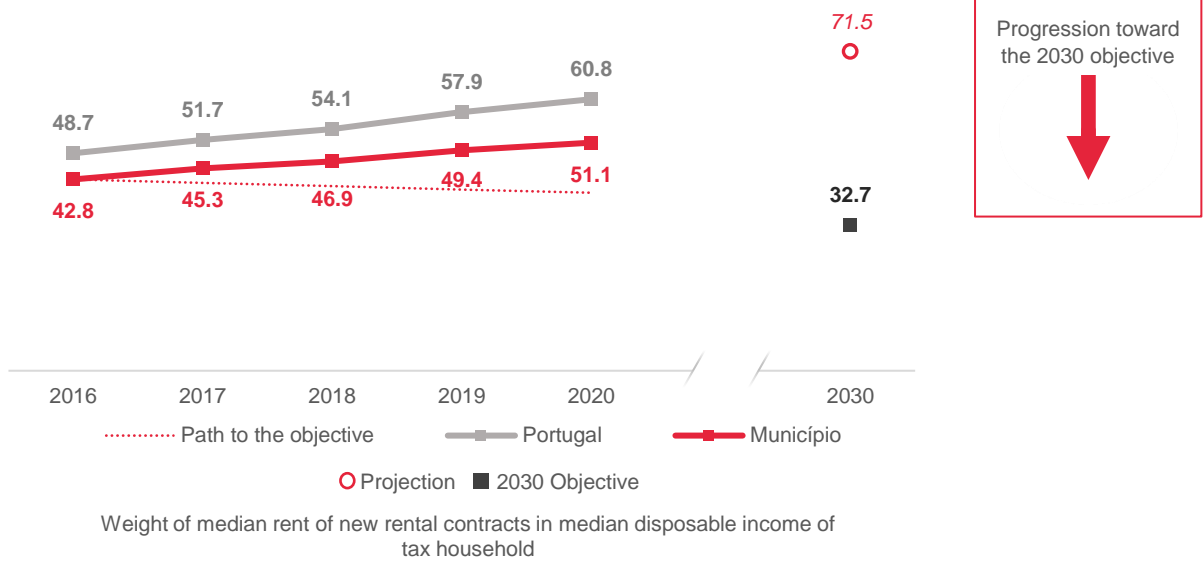

Indicator 1.4.1(b). Proportion of population living in households with a bath/shower and toilet in their home (%)²

Source: INE (2011), calculated by CESOP

² Indicators 1.4.1 (a) and (b) are partial indicators that complement each other in correspondence with UN indicator 1.4.1 "Proportion of population living in households with access to basic services".

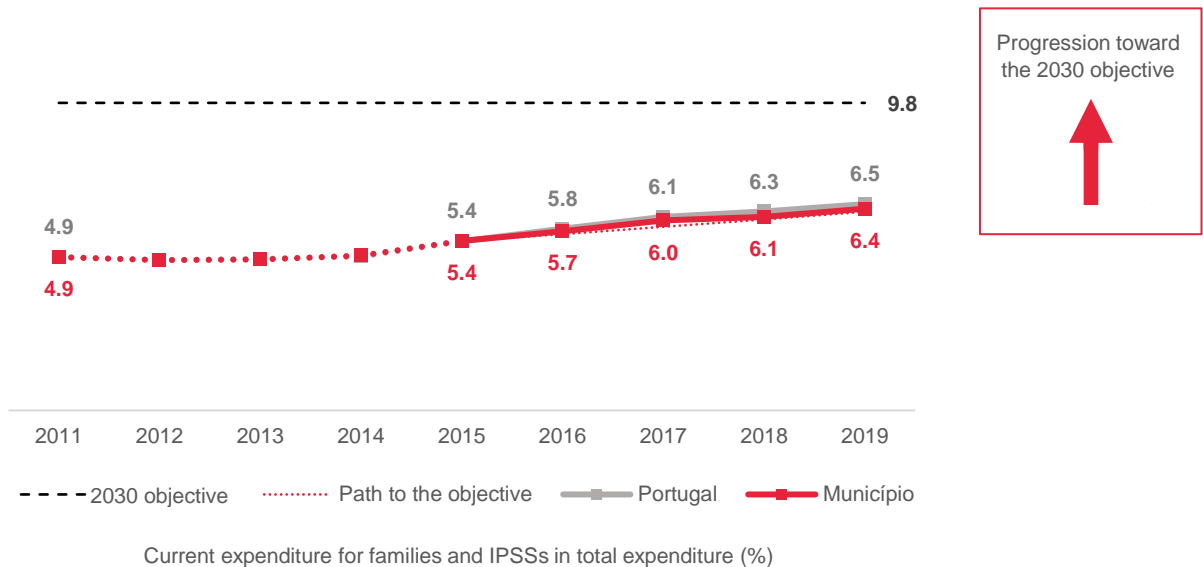

Indicator 1.4.1(c). Weight of median rent of new rental contracts in median disposable income of tax household

Source: INE (2016-2020), calculated by CESOP

Target 1.b | Create sound policy frameworks at the national, regional and international levels, based on pro-poor and gender-sensitive development strategies, to support accelerated investment in poverty eradication actions

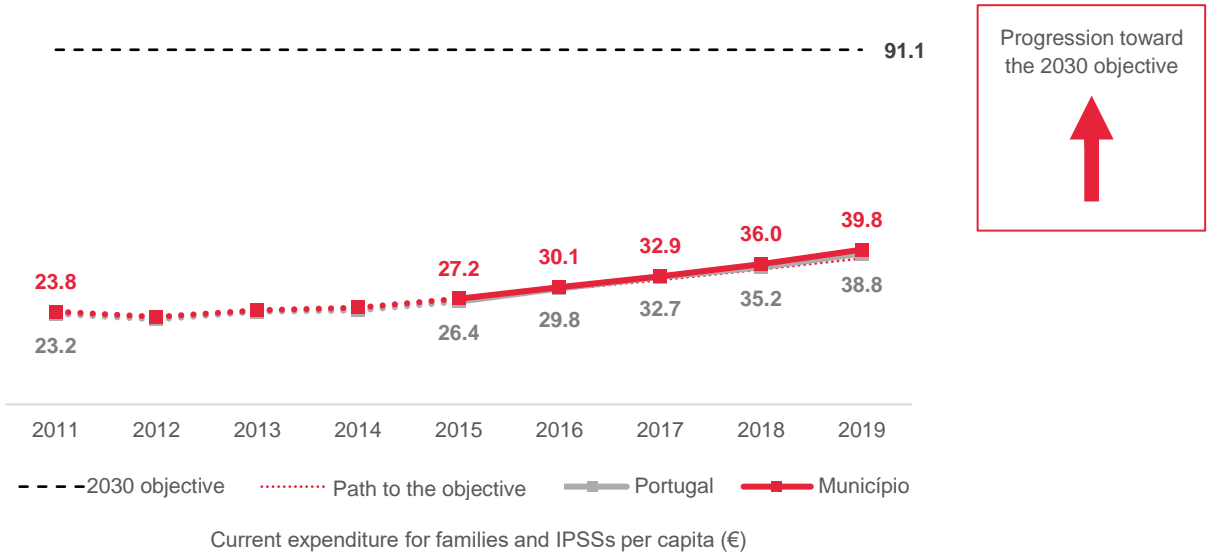

Indicator 1.b.1(a). Current expenditure for families and IPSSs³ in total expenditure (%)

Source: Portal Autárquico (2011-2019), calculated by CESOP

³ An IPSS (Instituição Particular de Solidariedade Social) in Portugal is a non-profit institution set up on the initiative of private individuals with the aim of giving organised expression to the moral duty of solidarity and justice between individuals, on condition that they are not administered by the State or by a local authority body

Indicator 1.b.1(b). Current expenditure for families and IPSSs per capita (€)

Source: Portal Autárquico (2011-2019), calculated by CESOP

SDG 2

ZERO HUNGER

END HUNGER, ACHIEVE FOOD SECURITY AND IMPROVED NUTRITION AND PROMOTE SUSTAINABLE AGRICULTURE

It is time to rethink how we grow, share and consume our food.

If done right, agriculture, forestry and fisheries can provide nutritious food for all and generate decent incomes, while supporting people-centred rural development and protecting the environment.

Right now, our soils, freshwater, oceans, forests and biodiversity are being rapidly degraded. Climate change is putting even more pressure on the resources we depend on, increasing risks associated with disasters such as droughts and floods. Many rural women and men can no longer make ends meet on their land, forcing them to migrate to cities in search of opportunities. profound change of the global food and agriculture system is needed if we are to nourish today's 795 million hungry and the additional 2 billion people expected by 2050.

The food and agriculture sector offers key solutions for development, and is central for hunger and poverty eradication.

→	The municipality is not making significant progress towards the 2030 objective
↘	The municipality is distancing itself from the 2030 objective
↓	The municipality is far from the 2030 objective path

Target 2.2 | By 2030, end all forms of malnutrition, including achieving, by 2025, the internationally agreed targets on stunting and wasting in children under 5 years of age, and address the nutritional needs of adolescent girls, pregnant and lactating women and older persons

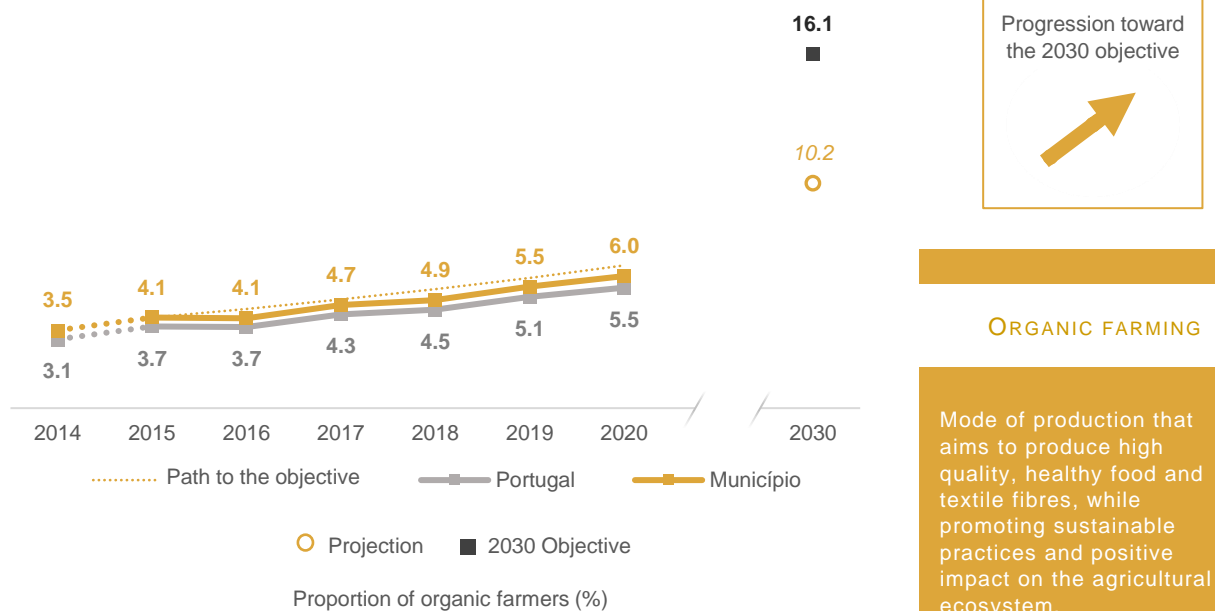

Indicator 2.2.2. Proportion of resident population with 18 and more years old with obesity, by sex, NUTS II (%)

Source: INE (2014 and 2019), no data at municipal level

Target 2.4 | By 2030, ensure sustainable food production systems and implement resilient agricultural practices that increase productivity and production, that help maintain ecosystems, that strengthen capacity for adaptation to climate change, extreme weather, drought, flooding and other disasters and that progressively improve land and soil quality

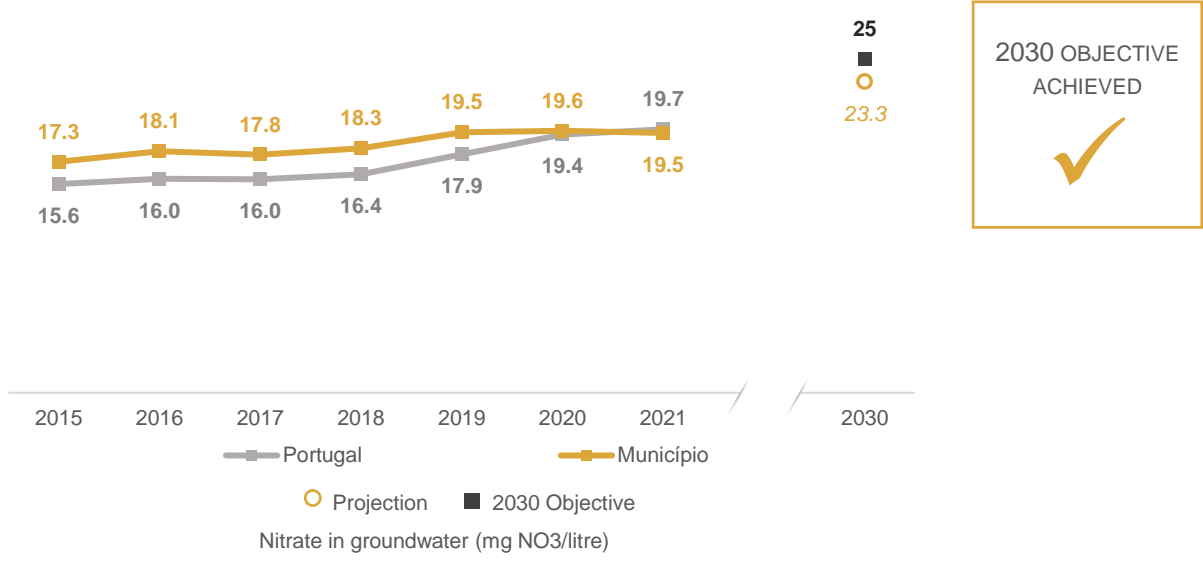

Indicator 2.4.1. Proportion of organic farmers (%)³

Source: DGADR (2014-2020), calculated by CESOP

³ The original UN indicator refers to "Proportion of agricultural area under productive and sustainable agriculture (%)" which may cover more practices than just certified organic farming. The INE, OECD and Eurostat refer to the proportion of agricultural area under organic farming, while the ISM indicator corresponds to the proportion of producers and preparers.

Indicator 2.4.2. Nitrate in groundwater (mg NO3/litre)

Source: SNIRH (2011/2015-2017/2021), calculated by CESOP

SDG 3

GOOD HEALTH AND WELL-BEING

ENSURE HEALTHY LIVES AND PROMOTE WELL-BEING FOR ALL AT ALL AGES

Ensuring healthy lives and promoting the well-being for all at all ages is essential to sustainable development. Significant strides have been made in increasing life expectancy and reducing some of the common killers associated with child and maternal mortality. Major progress has been made on increasing access to clean water and sanitation, reducing malaria, tuberculosis, polio and the spread of HIV/AIDS. However, many more efforts are needed to fully eradicate a wide range of diseases and address many different persistent and emerging health issues.

GLOBAL PERFORMANCE OF THE SDG 3

PROGRESS ON THE SDG 3 PERFORMANCE BETWEEN 2019 AND 2022

according to the evaluation criteria used in this edition

PERFORMANCE 2019-2022

TREND

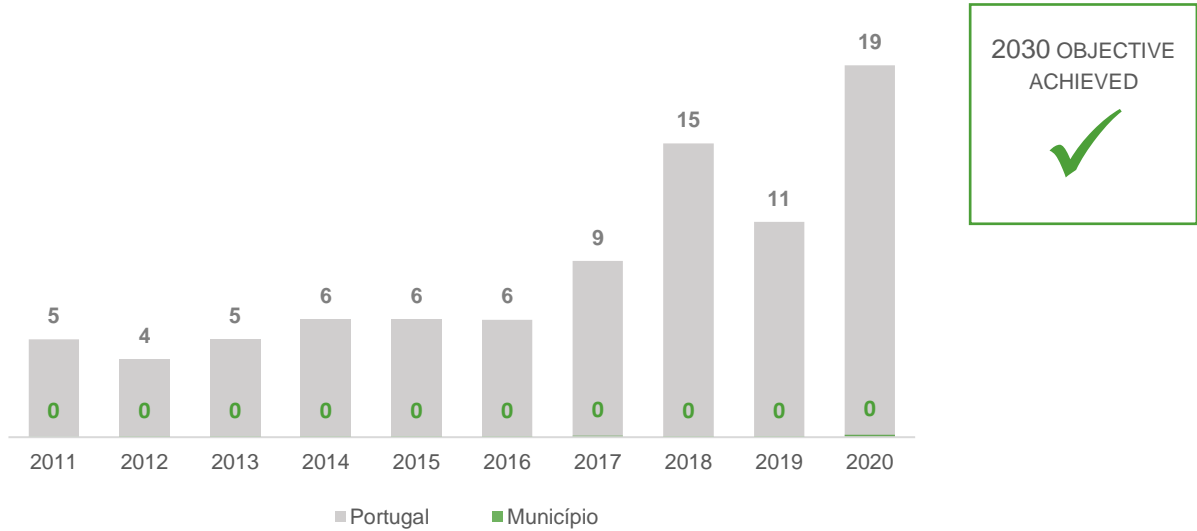

Meaning of the arrows showing the municipality's progress towards the 2030 objectives of this Goal

Arrow	Description
↑	The municipality is on track to meet the 2030 objectives, and progress is sufficient to achieve them
↗	The municipality is on track to meet the 2030 objectives, but will not be able to achieve them if it continues its current trend
→	The municipality is not making significant progress towards the 2030 objectives
↘	The municipality is distancing itself from the 2030 objectives
↓	The municipality is far from the 2030 objective path

Target 3.1 | By 2030, reduce the global maternal mortality ratio to less than 70 per 100,000 live births

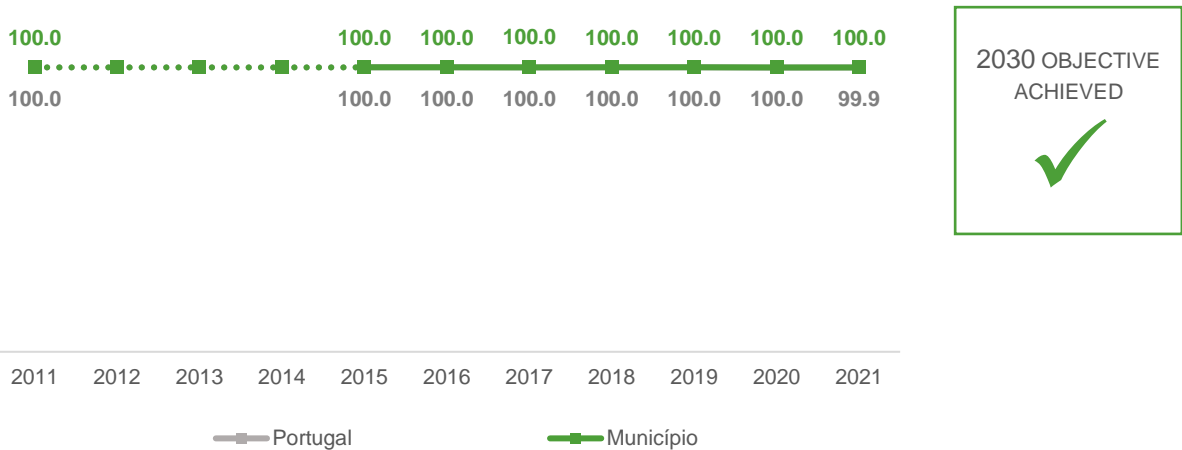

Indicator 3.1.1. Deaths from complications of pregnancy, childbirth and puerperium (Nº)⁴

. Deaths from complications of pregnancy, childbirth and puerperium (Nº)

Source: INE (2011-2020)

Indicator 3.1.2. Proportion of births (live births) attended by skilled health personnel (%)

Proportion of births (live births) attended by skilled health personnel (%)

Source: INE (2011-2021), calculated by CESOP

⁴ As the number of cases in Portugal is very low, we have chosen to present this indicator in total number of cases rather than using the rate per 100,000 live births, as is the practice in other organisations.

Target 3.2 | By 2030, end preventable deaths of newborns and children under 5 years of age, with all countries aiming to reduce neonatal mortality to at least as low as 12 per 1,000 live births and under-5 mortality to at least as low as 25 per 1,000 live births

Indicator 3.2.1. Five-year mortality rate of children aged 0-4 years per 1,000 live births (‰)

Source: INE (2007/2011-2017/2021), calculated by CESOP

Indicator 3.2.2. Five-year neonatal mortality rate (‰)

Source: INE (2007/2011-2017/2021), calculated by CESOP

TARGETS 3.1 AND 3.2 ARE CONSIDERED TO BE MET FOR ALL MUNICIPALITIES

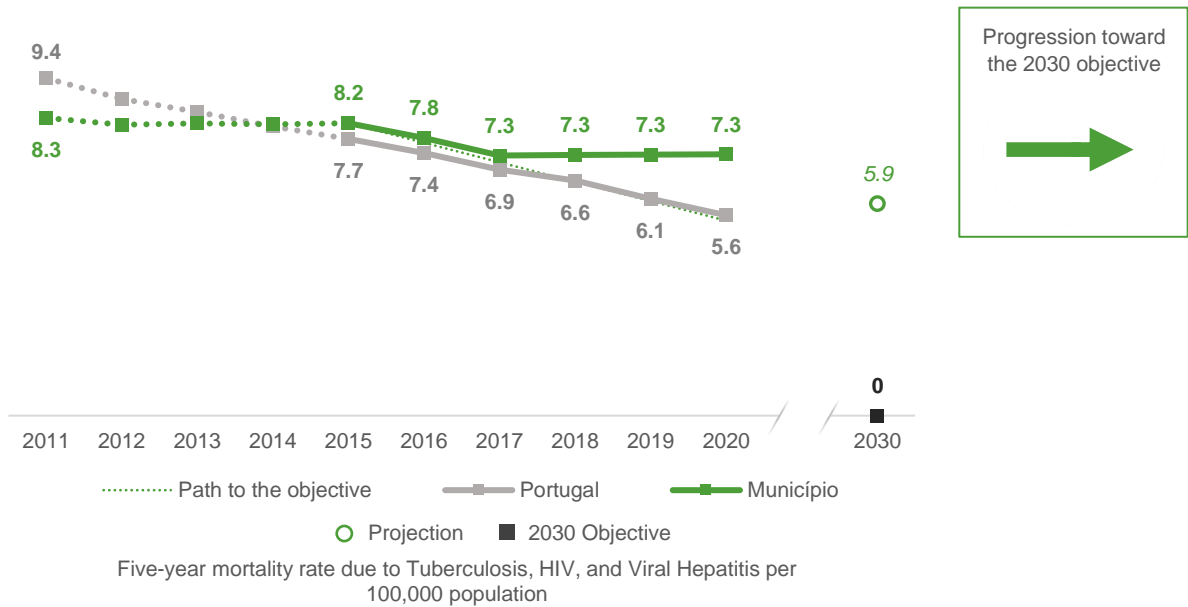

Target 3.3 | By 2030, end the epidemics of AIDS, tuberculosis, malaria and neglected tropical diseases and combat hepatitis, water-borne diseases and other communicable diseases

Indicator 3.3.1. Five-year rate of new HIV infections per 1,000 population

Source: INSA (2007/2011-2015/2019), calculated by CESOP

Indicator 3.3.2. Five-year mortality rate due to Tuberculosis, HIV, and Viral Hepatitis per 100,000 population

Source: INE (2007/2011-2016/2020), calculated by CESOP

Target 3.4 | By 2030, reduce by one third premature mortality from non-communicable diseases through prevention and treatment and promote mental health and well-being

Indicator 3.4.1. Mortality rate (30 to 70 years) due to diseases of the circulatory system, malignant neoplasms, diabetes mellitus and chronic respiratory diseases per 100 000 inhabitants

Source: INE (2011-2020), calculated by CESOP

Indicator 3.4.2. Five-year mortality rate due to intentional self-harm (suicide) per 100,000 inhabitants, by Sex

Source: INE (2011/2015-2016/2020), calculated by CESOP

Indicator 3.4.3. Proportion of resident population with 18 and more years old with obesity, by sex, NUTS II (%)

Source: INE (2014 and 2019), no data at municipal level

Indicator 3.4.4. Proportion of accidents at work declared by employees by type of accident (%)⁵

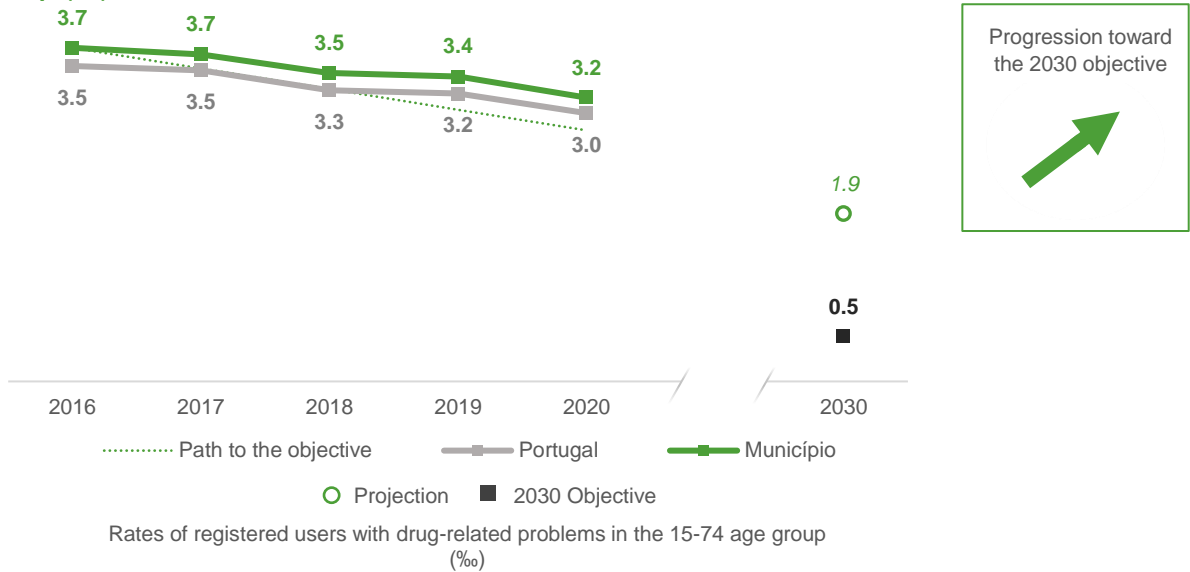

Source: GEP/MTSS (2015-2019), calculated by CESOP

⁵ The Eurostat indicator only considers the number of persons killed in an accident at work per 100,000 people in service.

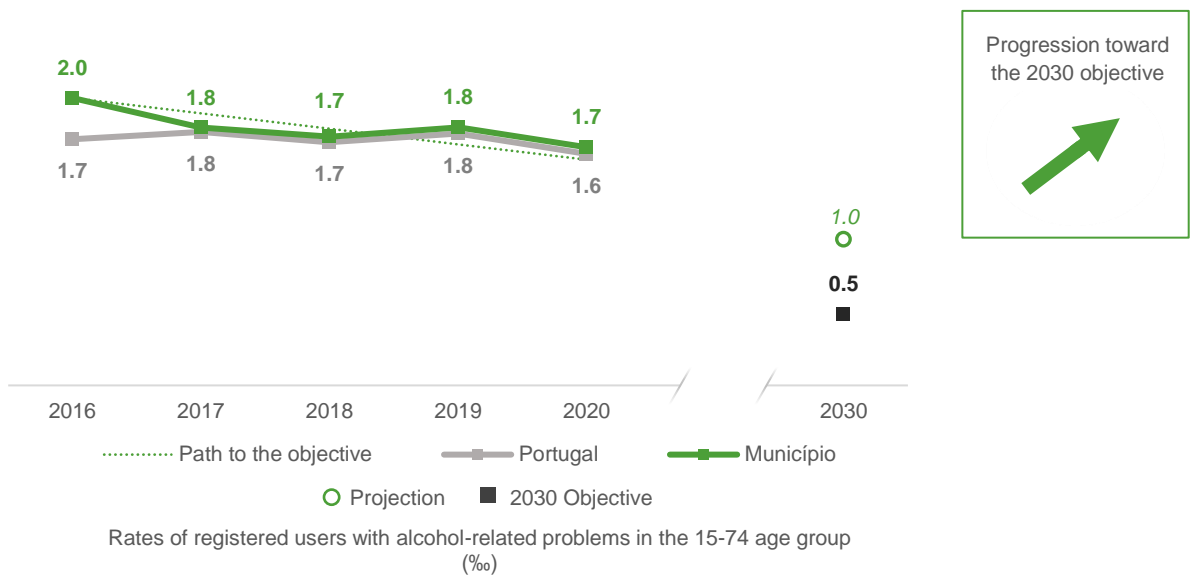

Target 3.5 | Strengthen the prevention and treatment of substance abuse, including narcotic drug abuse and harmful use of alcohol

Indicator 3.5.1. Rates of registered users with drug-related problems in the 15-74 age group (‰)

Source: SICAD (2016-2020), calculated by CESOP

Indicator 3.5.2. Rates of registered users with alcohol-related problems in the 15-74 age group (‰)

Source: SICAD (2016-2020), calculated by CESOP

Target 3.6 | By 2020, halve the number of global deaths and injuries from road traffic accidents

Indicator 3.6.1. Five-year mortality rate due to road accidents per 100 000 inhabitants

Source: INE (2012/2016-2016/2020)

Target 3.7 | By 2030, ensure universal access to sexual and reproductive health-care services, including for family planning, information and education, and the integration of reproductive health into national strategies and programmes

Indicator 3.7.2. Five-year adolescent fertility rate (‰)

Source: INE (2007/2011-2017/2021), calculated by CESOP

Target 3.9 | By 2030, substantially reduce the number of deaths and illnesses from hazardous chemicals and air, water and soil pollution and contamination

Indicator 3.9.1. Mortality rate attributed to household and ambient air pollution per 100 000 inhabitants

10

Nº PER 100 000 INHABITANTS

Source: WHO (2019)

Indicator 3.9.3 Accidental poisoning (intoxication) by drugs, medicines or biological substances (Nº)⁶

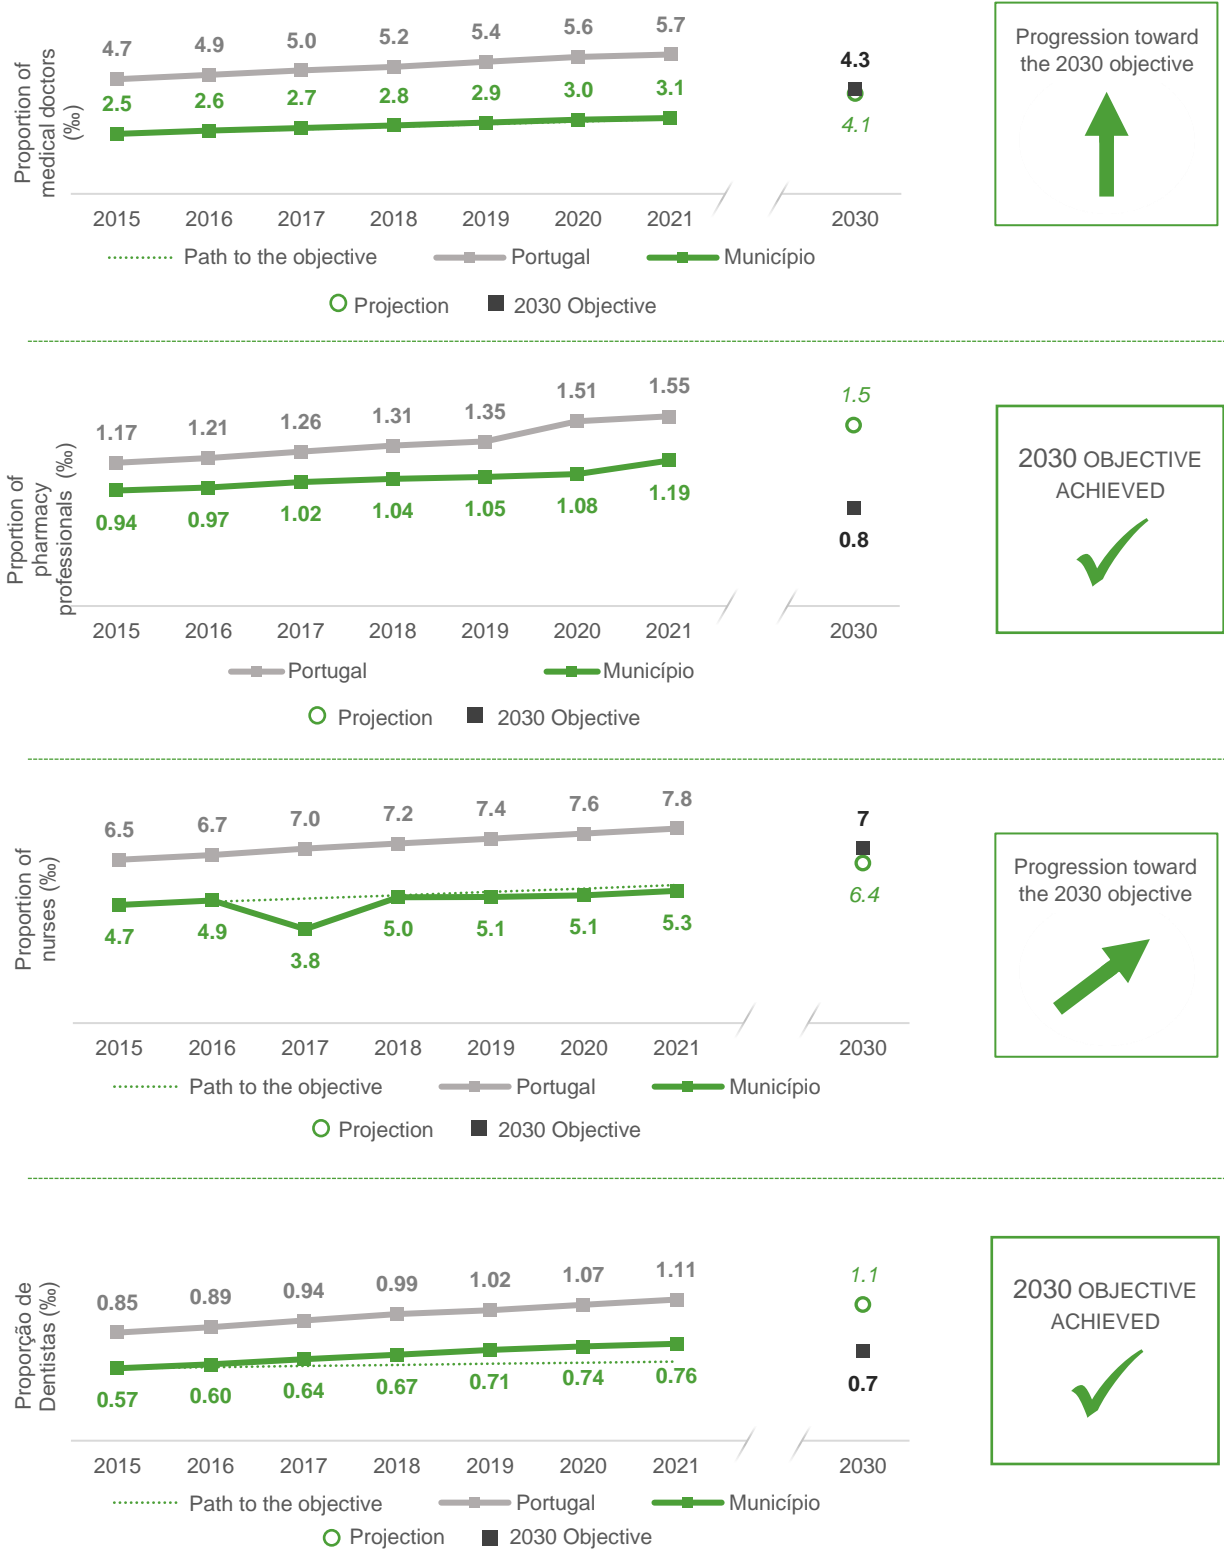

Accidental poisoning (intoxication) by drugs, medicines or biological substances (Nº)

Source: INE (2011-2020)

⁶ Since the number of cases in Portugal is very low, we have chosen to present this indicator in total number of cases rather than using the rate per 100 or 100,000 inhabitants, as is the practice in other organisations.

Target 3.c | Substantially increase health financing and the recruitment, development, training and retention of the health workforce in developing countries, especially in least developed countries and small island developing States

Indicator 3.c.1. Health worker density by speciality (%o)

Source: INE (2015-2021), calculated by CESOP

SDG 4

QUALITY EDUCATION

ENSURE INCLUSIVE AND QUALITY EDUCATION FOR ALL AND PROMOTE LIFELONG LEARNING

Obtaining a quality education is the foundation to improving people’s lives and sustainable development. Major progress has been made towards increasing access to education at all levels and increasing enrolment rates in schools particularly for women and girls. Basic literacy skills have improved tremendously, yet bolder efforts are needed to make even greater strides for achieving universal education goals. For example, the world has achieved equality in primary education between girls and boys, but few countries have achieved that target at all levels of education.

GLOBAL PERFORMANCE OF THE SDG 4

PROGRESS ON THE SDG 4 PERFORMANCE BETWEEN 2019 AND 2022

according to the evaluation criteria used in this edition

PERFORMANCE 2019-2022

TREND

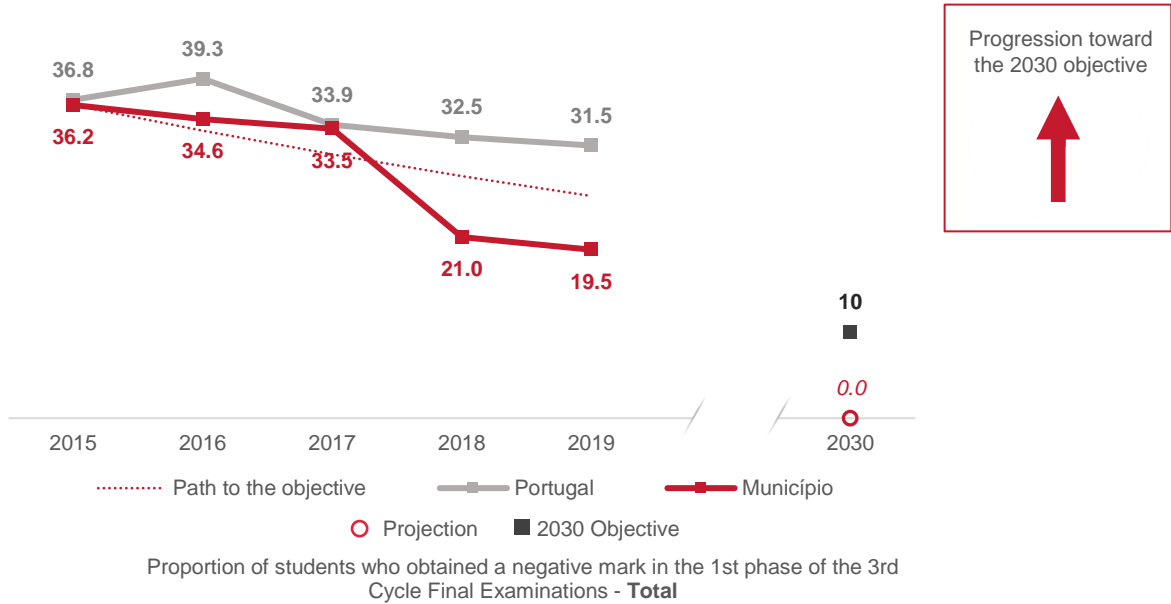

Meaning of the arrows showing the municipality's progress towards the 2030 objectives of this Goal

Arrow	Description
↑	The municipality is on track to meet the 2030 objectives, and progress is sufficient to achieve them
↗	The municipality is on track to meet the 2030 objectives, but will not be able to achieve them if it continues its current trend
→	The municipality is not making significant progress towards the 2030 objectives
↘	The municipality is distancing itself from the 2030 objectives
↓	The municipality is far from the 2030 objective path

Target 4.1 | By 2030, ensure that all girls and boys complete free, equitable and quality primary and secondary education leading to relevant and Goal-4 effective learning outcomes

Indicator 4.1.1. Proportion of students who obtained a negative mark in the 1st phase of the 3rd Cycle Final Examinations by Sex and Subject ⁷

Source: DGEEC (2014/2015-2018/2019), calculated by CESOP

Source: DGEEC (2018/2019), calculated by CESOP

⁷ Except for the UN, all the other institutions use as a partial indicator of the UN indicator the results of PISA (Programme for International Student Assessment), which is presented as an international test, conducted every three years, that assesses the level of proficiency of a sample of 15-year-old students in reading, mathematics and science. The ISM uses an indicator that approximates to point (c) of the global indicator "4.1.1 Proportion of children and young people (a) in grades 2/3; (b) at the end of primary; and (c) at the end of lower secondary achieving at least a minimum proficiency level in (i) reading and (ii) mathematics, by sex".

Indicator 4.1.2(a). Transition/completion rate in upper secondary education by courses (%)

Indicator 4.1.2(b). Transition/ completion rate in primary education by Cycle (%)

Target 4.2 | By 2030, ensure that all girls and boys have access to quality early childhood development, care and preprimary education so that they are ready for primary education

Indicator 4.2.2. Pre-school enrolment rate (%)

Source: INE (2010/2011-2020/2021)

The preschool enrolment rate describes the ratio between children aged 3-5 years living in the municipality and children enrolled in pre-school schools. Differences between the parents' municipality of work and municipality of residence may justify rates higher than 100%.

Target 4.3 | By 2030, ensure equal access for all women and men to affordable and quality technical, vocational and tertiary education, including university

Indicator 4.3.1. Proportion of population aged 15-64 attending secondary and tertiary education by Sex (%)

Proportion of population aged 15-64 attending secondary and tertiary education by Sex (%)

Source: INE (2011), calculated by CESOP

Indicator 4.3.2. Proportion of the population aged 25-34 with at least complete tertiary education by Sex (%)

Proportion of the population aged 25-34 with at least complete tertiary education by Sex (%)

Source: INE (2011), calculated by CESOP

Target 4.6 | By 2030, ensure that all youth and a substantial proportion of adults, both men and women, achieve literacy and numeracy

Indicator 4.6.1. Illiteracy rate by Sex (%)

Source: INE (2011)

Target 4.c | By 2030, substantially increase the supply of qualified teachers, including through international cooperation for teacher training in developing countries, especially least developed countries and small island developing states

Indicator 4.c.1(a). Proportion of teachers qualified in basic education (%)

Indicator 4.c.1(b). Percentage of teachers who participated in professional development activities in the last 12 months (%)

Source: DGEEC (2018)

SDG 5

GENDER EQUALITY

ACHIEVE GENDER EQUALITY AND EMPOWER ALL WOMEN AND GIRLS

While the world has achieved progress towards gender equality and women’s empowerment under the Millennium Development Goals (including equal access to primary education between girls and boys), women and girls continue to suffer discrimination and violence in every part of the world.

Gender equality is not only a fundamental human right, but a necessary foundation for a peaceful, prosperous and sustainable world.

Providing women and girls with equal access to education, health care, decent work, and representation in political and economic decision-making processes will fuel sustainable economies and benefit societies and humanity at large.

Arrow	Description
↑	The municipality is on track to meet the 2030 objectives, and progress is sufficient to achieve them
↗	The municipality is on track to meet the 2030 objectives, but will not be able to achieve them if it continues its current trend
→	The municipality is not making significant progress towards the 2030 objectives
↘	The municipality is distancing itself from the 2030 objectives
↓	The municipality is far from the 2030 objective path

Target 5.1 | End all forms of discrimination against all women and girls everywhere

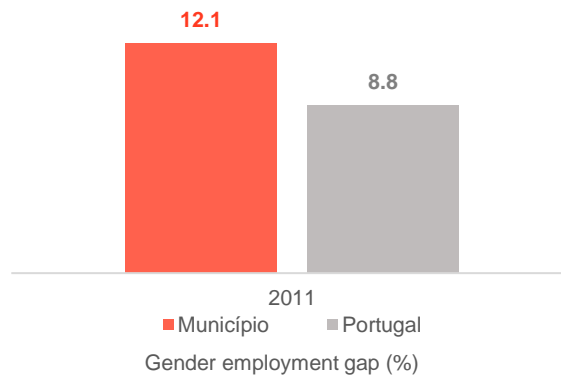

Indicator 5.1.1. Existence of a Cooperation Protocol with the Commission for Citizenship and Gender Equality and/or a Municipal Plan for Equality and Non-Discrimination⁸

YES ✓

83% of Portuguese municipalities have signed a protocol with the CIG and/or have a Municipal Plan for Equality and Non-Discrimination

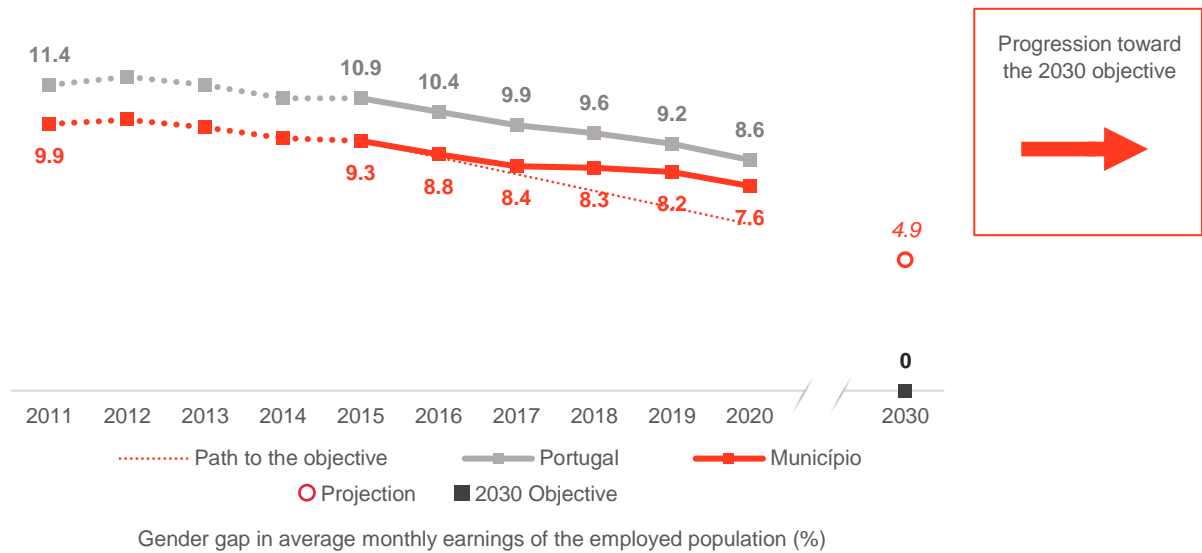

Source: CIG (2021)

Indicator 5.1.2. Gender employment gap (%)

Source: INE (2011), calculated by CESOP

Indicator 5.1.3. Gender gap in average monthly earnings of the employed population (%)

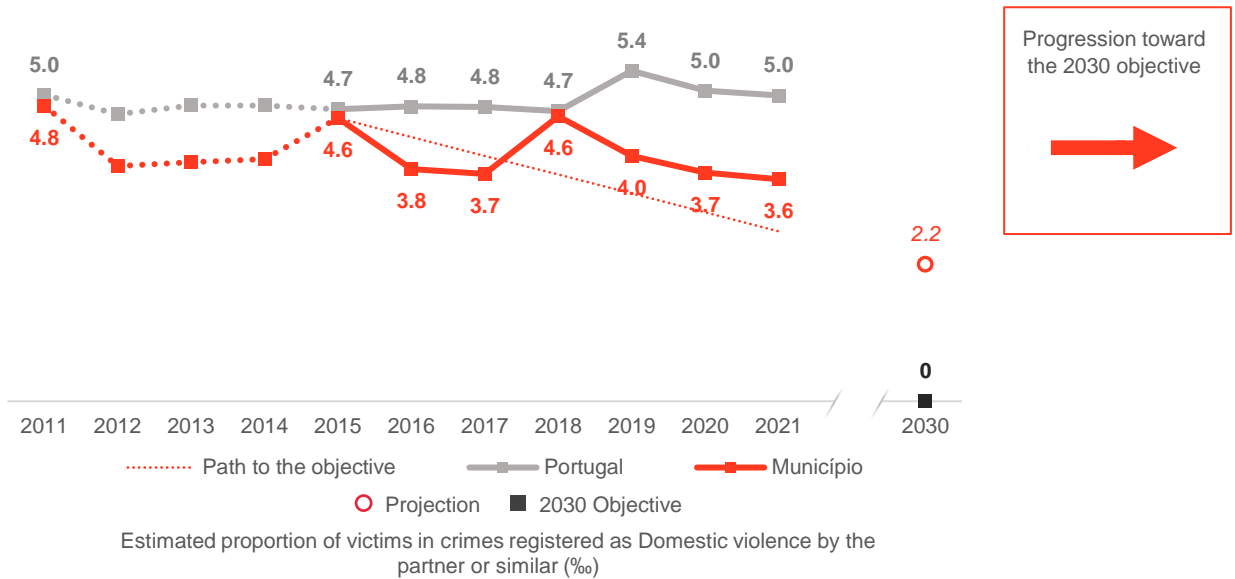

Source: INE (2011-2020)

⁸ The UN and OECD indicator refers to the “Whether or not legal frameworks are in place to promote, enforce and monitor equality and non-discrimination on the basis of sex”.

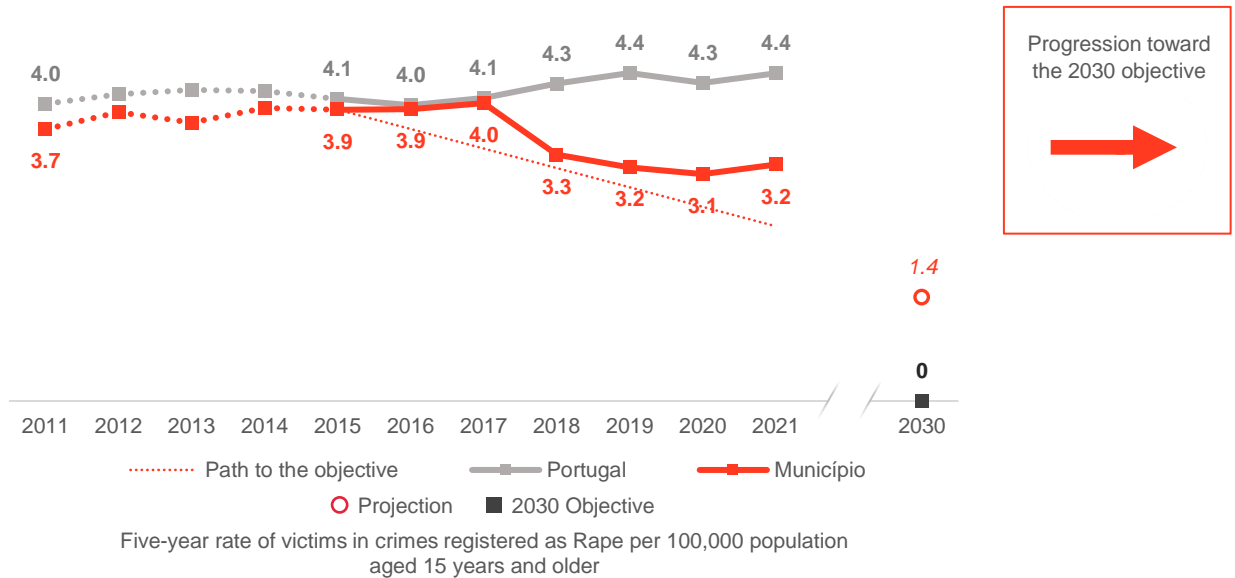

Target 5.2 | Eliminate all forms of violence against all women and girls in the public and private spheres, including trafficking and sexual and other types of exploitation

Indicator 5.2.1. Estimated proportion of victims in crimes registered as Domestic violence by the partner or similar (%)

Source: DGPJ (2011-2021), calculated by CESOP

Indicator 5.2.2. Five-year rate of victims in crimes registered as Rape per 100,000 population aged 15 years and older

Source: DGPJ (2007/2011-2017/2021), calculated by CESOP

Target 5.3 | Eliminate all harmful practices, such as child, early and forced marriage and female genital mutilation

Indicator 5.3.1. Proportion of 16-19 year old who married (%)

Source: INE (2015-2021), calculated by CESOP

THE PRACTICES OF FORCED MARRIAGES AND FEMALE GENITAL MUTILATION ARE RARE IN PORTUGAL. FOR THIS REASON, TARGET 5.3 IS CONSIDERED TO HAVE BEEN MET IN ALL MUNICIPALITIES IN THE COUNTRY.

Target 5.5 | Ensure women’s full and effective participation and equal opportunities for leadership at all levels of decisionmaking in political, economic and public life

Indicator 5.5.2(a). Proportion of women in management positions (%)

Source: INE (2011), calculated by CESOP

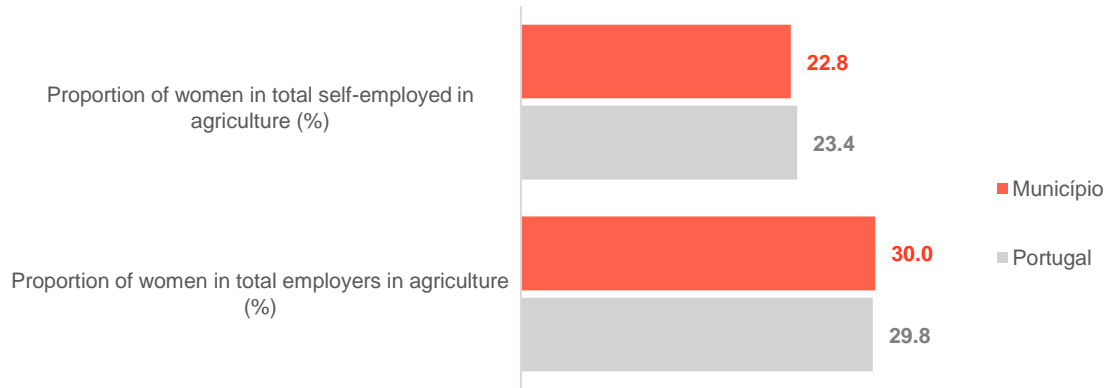

Indicator 5.5.2(b). Proportion of female employers (%)

Source: Pordata (2011-2019), calculated by CESOP

Target 5.a | Undertake reforms to give women equal rights to economic resources, as well as access to ownership and control over land and other forms of property, financial services, inheritance and natural resources, in accordance with national laws

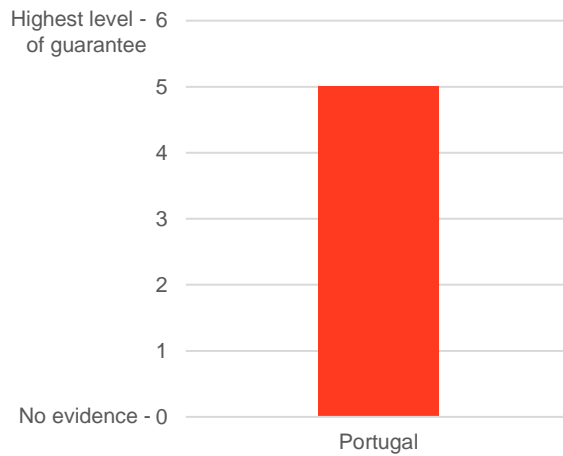

Indicator 5.a.1. Proportion of women in total managers in agriculture by type of employment status (%)

Proportion of women in total managers in agriculture by type of employment status (%)

Source: INE (2011), calculated by CESOP

Indicator 5.a.2. Degree to which the legal framework (including customary law) guarantees women's equal rights to land ownership and/or control

Source: UN (2019)

SDG 6

CLEAN WATER AND SANITATION

ENSURE ACCESS TO WATER AND SANITATION FOR ALL

Clean, accessible water for all is an essential part of the world we want to live in. There is sufficient fresh water on the planet to achieve this. But due to bad economics or poor infrastructure, every year millions of people, most of them children, die from diseases associated with inadequate water supply, sanitation and hygiene.

Water scarcity, poor water quality and inadequate sanitation negatively impact food security, livelihood choices and educational opportunities for poor families across the world. Drought afflicts some of the world's poorest countries, worsening hunger and malnutrition.

By 2050, at least one in four people is likely to live in a country affected by chronic or recurring shortages of fresh water.

SDG 8

DECENT WORK AND ECONOMIC GROWTH

PROMOTE SUSTAINED, INCLUSIVE AND SUSTAINABLE ECONOMIC GROWTH, FULL AND PRODUCTIVE EMPLOYMENT AND DECENT WORK FOR ALL

Roughly half the world’s population still lives on the equivalent of about US\$2 a day. And in too many places, having a job doesn’t guarantee the ability to escape from poverty. This slow and uneven progress requires us to rethink and retool our economic and social policies aimed at eradicating poverty.

A continued lack of decent work opportunities, insufficient investments and under-consumption lead to an erosion of the basic social contract underlying democratic societies: that all must share in progress. The creation of quality jobs will remain a major challenge for almost all economies well beyond 2015.

Sustainable economic growth will require societies to create the conditions that allow people to have quality jobs that stimulate the economy while not harming the environment. Job opportunities and decent working conditions are also required for the whole working age population.

SDG 9

INDUSTRY, INNOVATION AND INFRASTRUCTURE

**BUILD RESILIENT INFRASTRUCTURE,
PROMOTE SUSTAINABLE
INDUSTRIALIZATION AND FOSTER
INNOVATION**

Investments in infrastructure – transport, irrigation, energy and information and communication technology – are crucial to achieving sustainable development and empowering communities in many countries. It has long been recognized that growth in productivity and incomes, and improvements in health and education outcomes require investment in infrastructure.

Inclusive and sustainable industrial development is the primary source of income generation, allows for rapid and sustained increases in living standards for all people, and provides the technological solutions to environmentally sound industrialization.

Technological progress is the foundation of efforts to achieve environmental objectives, such as increased resource and energy-efficiency. Without technology and innovation, industrialization will not happen, and without industrialization, development will not happen.

Meaning of the arrows showing the municipality's progress towards the 2030 objectives of this Goal

Arrow	Description
↑	The municipality is on track to meet the 2030 objectives, and progress is sufficient to achieve them
↗	The municipality is on track to meet the 2030 objectives, but will not be able to achieve them if it continues its current trend
→	The municipality is not making significant progress towards the 2030 objectives
↘	The municipality is distancing itself from the 2030 objectives
↓	The municipality is far from the 2030 objective path

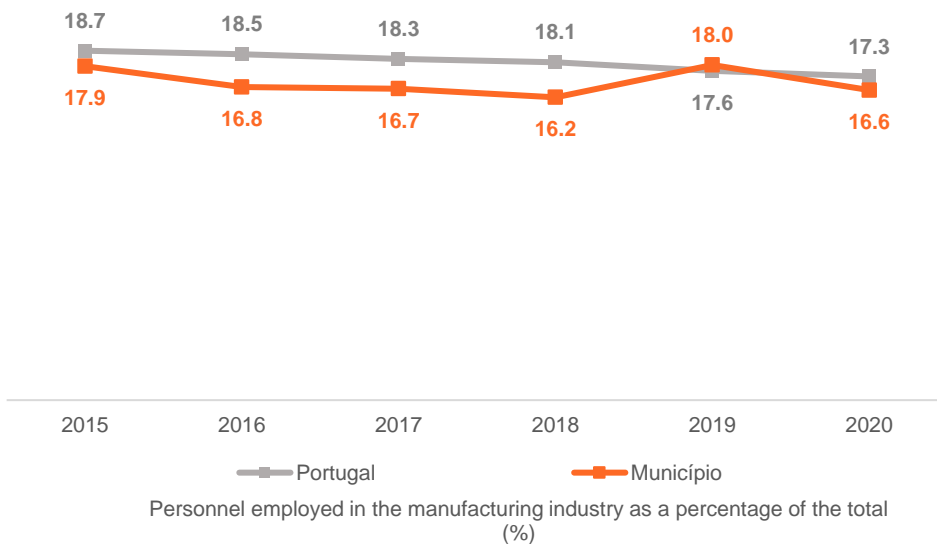

Target 9.2 | Promote inclusive and sustainable industrialization and, by 2030, significantly raise industry’s share of employment and gross domestic product, in line with national circumstances, and double its share in least developed countries

Indicator 9.2.1. Manufacturing value added per capita (€)

Source: INE (2015-2020), calculated by CESOP

Indicator 9.2.2. Personnel employed in the manufacturing industry as a percentage of the total (%)

Source: INE (2015-2020), calculated by CESOP

Target 9.4 | By 2030, upgrade infrastructure and retrofit industries to make them sustainable, with increased resource-use efficiency and greater adoption of clean and environmentally sound technologies and industrial processes, with all countries taking action in accordance with their respective capabilities

Indicator 9.4.1. CO2 emissions per unit of GVA of companies in the municipality (kg CO₂/€)¹⁰

Source: APA/INE (2015-2019), calculated by CESOP

Indicator 9.4.2. CO2 emissions per municipality (t CO₂/km²)

Source: APA/INE (2015-2019), calculated by CESOP

¹⁰ Unlike the UN and INE indicator, the ISM indicator considers the GVA produced by all the companies present in the territory and not only the manufacturing companies.

SDG 10

REDUCED INEQUALITIES

REDUCE INEQUALITY WITHIN AND AMONG COUNTRIES

The international community has made significant strides towards lifting people out of poverty. The most vulnerable nations – the least developed countries, the landlocked developing countries and the small island developing states – continue to make inroads into poverty reduction. However, inequality still persists and large disparities remain in access to health and education services and other assets.

Additionally, while income inequality between countries may have been reduced, inequality within countries has risen. There is growing consensus that economic growth is not sufficient to reduce poverty if it is not inclusive and if it does not involve the three dimensions of sustainable development – economic, social and environmental.

To reduce inequality, policies should be universal in principle paying attention to the needs of disadvantaged and marginalized populations.

GLOBAL PERFORMANCE OF THE SDG 10

PROGRESS ON THE SDG 10 PERFORMANCE BETWEEN 2019 AND 2022

according to the evaluation criteria used in this edition

PERFORMANCE 2019-2022

TREND

Meaning of the arrows showing the municipality's progress towards the 2030 objectives of this Goal

Arrow	Description
↑	The municipality is on track to meet the 2030 objectives, and progress is sufficient to achieve them
↗	The municipality is on track to meet the 2030 objectives, but will not be able to achieve them if it continues its current trend
→	The municipality is not making significant progress towards the 2030 objectives
↘	The municipality is distancing itself from the 2030 objectives
↓	The municipality is far from the 2030 objective path

Target 10.1 | By 2030, progressively achieve and sustain income growth of the bottom 40 per cent of the population at a rate higher than the national average

Indicator 10.1.1. Purchasing power index per capita

The objective for 2030 (100) represents the average purchasing power in the European Union. Thus, Portugal's objective for 2030 is to reach the average level of purchasing power in the European Union.

Indicator 10.1.2. Gini coefficient of gross monetary of tax household income (%)

Indicator 10.1.3. Ratio between average disposable income of top and bottom quintiles

Source: INE (2015-2020)

Target 10.2 | By 2030, empower and promote the social, economic and political inclusion of all, irrespective of age, sex, disability, race, ethnicity, origin, religion or economic or other status

Indicator 10.2.1. Proportion of RSI¹¹ beneficiaries in the working-age resident population (‰)

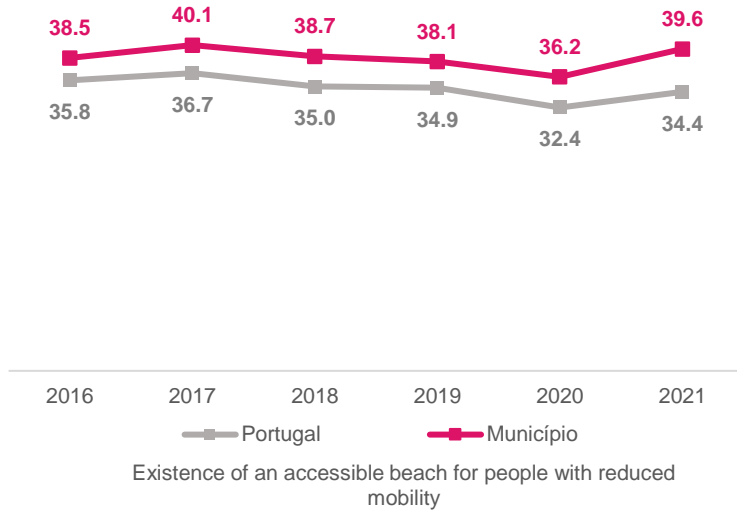

Source: INE (2011-2020), calculated by CESOP

¹¹ The Social Insertion Income (RSI, Portuguese acronym) is a benefit of the Portuguese Solidarity Subsystem within the Social Protection System of Citizenship of the Portuguese Social Security.

Indicator 10.2.2. Existence of an accessible beach for people with reduced mobility

YES ✓

The presence of accessible beaches for people with reduced mobility is valued but not compulsory. The construction work needed to create access can harm the fauna and flora.

Source: INE (2016-2021), calculated by CESOP

Target 10.7 | Facilitate orderly, safe, regular and responsible migration and mobility of people, including through the implementation of planned and well-managed migration policies

Indicator 10.7.2. Existence of municipal plans and structures for immigrant integration

YES ✓

54% of Portuguese municipalities with a population of foreigners over 1% have measures in place to integrate them

Source: ACM (2021), calculated by CESOP

SDG 11

SUSTAINABLE CITIES AND COMMUNITIES

MAKE CITIES INCLUSIVE, SAFE, RESILIENT AND SUSTAINABLE

Cities are hubs for ideas, commerce, culture, science, productivity, social development and much more. At their best, cities have enabled people to advance socially and economically.

However, many challenges exist to maintaining cities in a way that continues to create jobs and prosperity while not straining land and resources. Common urban challenges include congestion, lack of funds to provide basic services, a shortage of adequate housing and declining infrastructure.

The challenges cities face can be overcome in ways that allow them to continue to thrive and grow, while improving resource use and reducing pollution and poverty. The future we want includes cities of opportunities for all, with access to basic services, energy, housing, transportation and more.

SDG 12

RESPONSIBLE CONSUMPTION AND PRODUCTION

ENSURE SUSTAINABLE CONSUMPTION AND PRODUCTION PATTERNS

Sustainable consumption and production is about promoting resource and energy efficiency, sustainable infrastructure, and providing access to basic services, green and decent jobs and a better quality of life for all. Its implementation helps to achieve overall development plans, reduce future economic, environmental and social costs, strengthen economic competitiveness and reduce poverty.

Sustainable consumption and production aims at “doing more and better with less,” increasing net welfare gains from economic activities by reducing resource use, degradation and pollution along the whole lifecycle, while increasing quality of life. It involves different stakeholders, including business, consumers, policy makers, researchers, scientists, retailers, media, and development cooperation agencies, among others.

It also requires a systemic approach and cooperation among actors operating in the supply chain, from producer to final consumer. It involves engaging consumers through awareness-raising and education on sustainable consumption and lifestyles, providing consumers with adequate information through standards and labels and engaging in sustainable public procurement, among others.

SDG 13

CLIMATE ACTION

TAKE URGENT ACTION TO COMBAT CLIMATE CHANGE AND ITS IMPACTS

Climate change is now affecting every country on every continent. It is disrupting national economies and affecting lives, costing people, communities and countries dearly today and even more tomorrow.

People are experiencing the significant impacts of climate change, which include changing weather patterns, rising sea level, and more extreme weather events. The greenhouse gas emissions from human activities are driving climate change and continue to rise. They are now at their highest levels in history. Without action, the world’s average surface temperature is projected to rise over the 21st century and is likely to surpass 3 degrees Celsius this century—with some areas of the world expected to warm even more. The poorest and most vulnerable people are being affected the most.

Affordable, scalable solutions are now available to enable countries to leapfrog to cleaner, more resilient economies. The pace of change is quickening as more people are turning to renewable energy and a range of other measures that will reduce emissions and increase adaptation efforts.

But climate change is a global challenge that does not respect national borders. Emissions anywhere affect people everywhere. It is an issue that requires solutions that need to be coordinated at the international level and it requires international cooperation to help developing countries move toward a low-carbon economy.

SDG 14

LIFE BELOW WATER

CONSERVE AND SUSTAINABLY USE THE OCEANS, SEAS AND MARINE RESOURCES FOR SUSTAINABLE DEVELOPMENT

The world's oceans – their temperature, chemistry, currents and life – drive global systems that make the Earth habitable for humankind.

Our rainwater, drinking water, weather, climate, coastlines, much of our food, and even the oxygen in the air we breathe, are all ultimately provided and regulated by the sea. Throughout history, oceans and seas have been vital conduits for trade and transportation.

Photo by Joakant

Careful management of this essential global resource is a key feature of a sustainable future.

SDG 15

LIFE ON LAND

PROTECT, RESTORE AND PROMOTE SUSTAINABLE USE OF TERRESTRIAL ECOSYSTEMS, SUSTAINABLY MANAGE FORESTS, COMBAT DESERTIFICATION, AND HALT AND REVERSE LAND DEGRADATION AND HALT BIODIVERSITY LOSS

Forests cover 30 per cent of the Earth's surface and in addition to providing food security and shelter, forests are key to combating climate change, protecting biodiversity and the homes of the indigenous population. Thirteen million hectares of forests are being lost every year while the persistent degradation of drylands has led to the desertification of 3.6 billion hectares.

Deforestation and desertification – caused by human activities and climate change – pose major challenges to sustainable development and have affected the lives and livelihoods of millions of people in the fight against poverty. Efforts are being made to manage forests and combat desertification.

SDG 16

PEACE, JUSTICE AND STRONG INSTITUTIONS

PROMOTE PEACEFUL AND INCLUSIVE SOCIETIES FOR SUSTAINABLE DEVELOPMENT, PROVIDE ACCESS TO JUSTICE FOR ALL AND BUILD EFFECTIVE, ACCOUNTABLE AND INCLUSIVE INSTITUTIONS AT ALL LEVELS

The threats of international homicide, violence against children, human trafficking and sexual violence are important to address to promote peaceful and inclusive societies for sustainable development. They pave the way for the provision of access to justice for all and for building effective, accountable institutions at all levels.

To tackle these challenges and build a more peaceful, inclusive societies, there needs to be more efficient and transparent regulations put in place and comprehensive, realistic government budgets. One of the first steps towards protecting individual rights is the implementation of worldwide birth registration and the creation of more independent national human rights institutions around the world.

Source: United Nations (2020)

SDG 17

PARTNERSHIPS FOR THE GOALS

STRENGTHEN THE MEANS OF IMPLEMENTATION AND REVITALIZE THE GLOBAL PARTNERSHIP FOR SUSTAINABLE DEVELOPMENT

A successful sustainable development agenda requires partnerships between governments, the private sector and civil society. These inclusive partnerships built upon principles and values, a shared vision, and shared goals that place people and the planet at the centre, are needed at the global, regional, national and local level.

Urgent action is needed to mobilize, redirect and unlock the transformative power of trillions of dollars of private resources to deliver on sustainable development objectives. Long-term investments, including foreign direct investment, are needed in critical sectors, especially in developing countries. These include sustainable energy, infrastructure and transport, as well as information and communications technologies. The public sector will need to set a clear direction. Review and monitoring frameworks, regulations and incentive structures that enable such investments must be retooled to attract investments and reinforce sustainable development. National oversight mechanisms such as supreme audit institutions and oversight functions by legislatures should be strengthened.

Annex 3 - Meta-information on ISM 2022 indicators

SDG	Indicators	Year of ISM entry	Geographic scope	Best value	Upper Limit Green (100)	Lower Limit Red (0)	Lowest value	Source of the limit values	Type
	Extra.17.a Ratio of environmental taxes to labour taxes	2019	Municipal	9.7	1	0	0.0	Eurostat CESOP	C2

Means of setting limit values for indicators	
A1	SDG-based, absolute target in the future End-value referred to in SDGs, e.g. infant mortality at 12 per 1 000 lives
A2	SDG-based, target relative to starting position End-value referred to in SDGs, e.g. reduce by half the proportion of people living in poverty
B1	Other international agreement or shared aspirations, absolute target in the future End-value set by International Agreements, Good Practices or other Established Frameworks, e.g. achieve 60% of municipal waste prepared for re-use and recycling (European Commission)
B2	Other international agreement or shared aspirations, target relative to starting position End-value set by International Agreements, Good Practices or other Established Frameworks, e.g. Reduce greenhouse gas emissions by 60% compared with 2009 level (European Commission)
C1	No explicit value; performance benchmarked against OECD or EU top performers End-value set by CESOP-Local by based on the 5 top performers within the country, OECD countries or EU countries in 2015
C2	No explicit value, estimated on the basis of national values End-value set by CESOP-Local by based on country values in 2015: national average + or - standard deviation * 1.5
D	No normative direction

Annex 4 - Correspondences between ISM 2022 Indicators and References at national and international level.
